

# Ear Corn Dryer

## HIGH BEAM

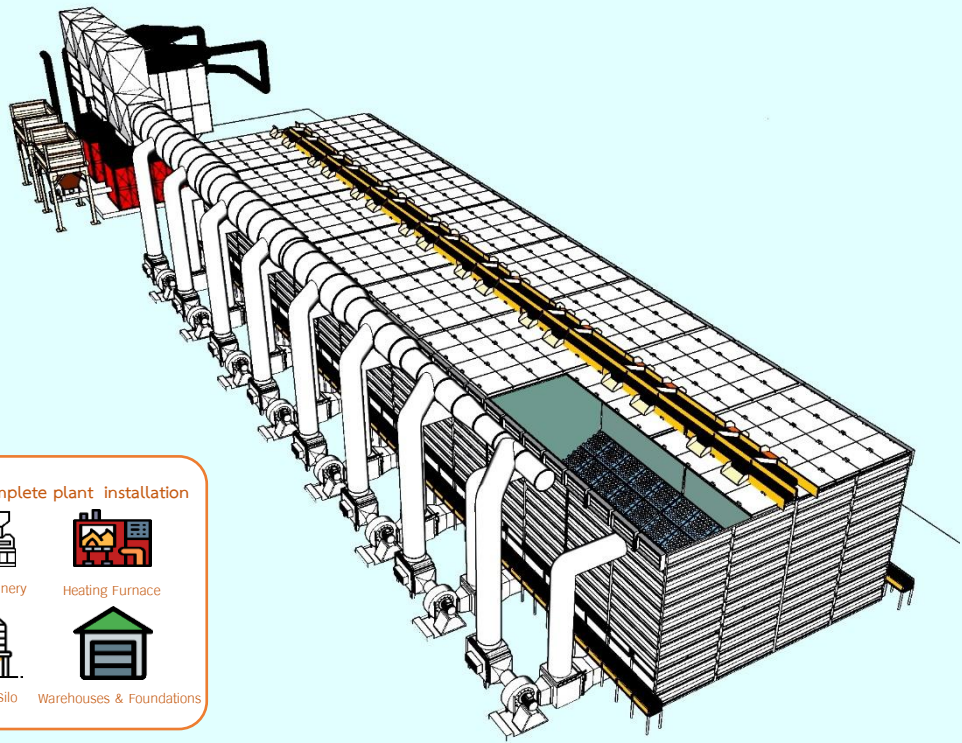

**HIGH BEAM Ear Corn Drying System** is the efficiency improvement in seed corn drying technology.

**The even clean air flow** with the indirect air to air heat exchanger in the HIGH BEAM Furnace ensure the good performance and the best quality of final products.

**Guarantee the seed germination upto 99.99 %**

**High Beam provided with Fully Automated System** for easy and convenience operation such as cleaning loading drying equipments with PLC control and touch screen display.

**Modular units design** simplified installation for increased future flexibility.

With full service complete plant installation

Conveyor System

Machinery

Heating Furnace

Electrical System

Storage Silo

Warehouses & Foundations

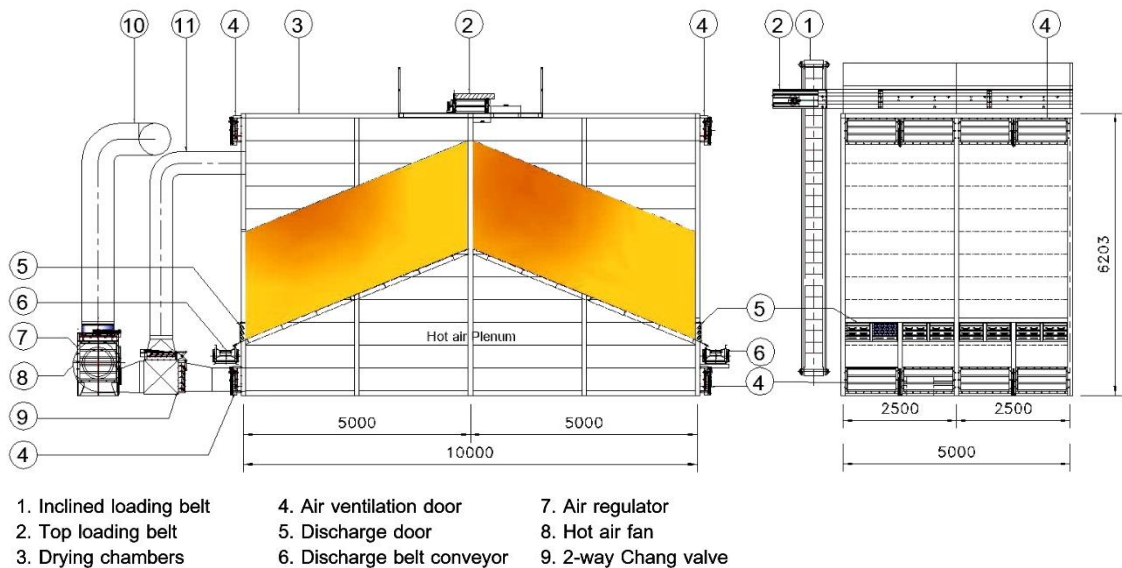

## CAPACITY :

Holding /Chamber (5x5xh 2 m.) 50 cbm 3.5 t

Hot Air Flow : 25,000 CMH

Drying Temp. : 40 Deg.C \* For Seed drying

Drying Rate approx. : 0.25% /h
